PROFESSIONAL SUMMARY

Computer Science undergraduate and aspiring Software Engineering Intern with strong problem-solving skills and hands-on experience in Java (DSA), Python, and Full Stack Development. Developed real-world applications using React, FastAPI, REST APIs, and machine learning models, including CNN-based image classification systems.

EDUCATION

Bahra University | B.Tech in Computer Science & Engineering
CGPA: 7.5

2022 - 2026

TECHNICAL SKILLS

- **Languages:** Java (Core + DSA), Python, C++, JavaScript, TypeScript, SQL.
- **Web Frameworks:** React.js, Angular, Flask, FastAPI, HTML, CSS, JDBC, REST APIs.
- **Cloud & DevOps:** AWS (EC2, S3 – basic deployment and storage), Git, GitHub
- **AI & Fundamentals:** Machine Learning, Deep Learning (CNNs), OpenAI API Integration, OOP, Data Structures

PROJECTS

AI Quiz Builder | [Source Code](#) | **Tech Stack:** Python (FastAPI), OpenAI API, HTML, CSS, JavaScript

- Developed a full-stack web application that generates real-time quizzes using Generative AI based on user-defined topics.
- Integrated the OpenAI API to automate quiz content generation, reducing manual effort and improving scalability.
- Built RESTful APIs using FastAPI to handle requests efficiently and support dynamic quiz generation.
- Designed a responsive and intuitive user interface using HTML, CSS, and JavaScript to enhance user experience.

Plant Disease Detection System | [Source Code](#) | **Tech Stack:** Python, Deep Learning, TensorFlow, OpenCV, NumPy

- Designed and implemented a deep learning-based system to classify plant leaf images into healthy and diseased categories using CNNs.
- Applied image preprocessing and feature extraction techniques with OpenCV and NumPy to improve model accuracy and consistency.
- Trained and evaluated the model on a labeled dataset, achieving reliable classification performance.
- Demonstrated practical application in agriculture by enabling early disease detection to help reduce crop loss.

CERTIFICATIONS & ACHIEVEMENTS

- **Coding Profile:** Solved multiple DSA problems on LeetCode using Java, focusing on logic building and optimization.
- **Certifications:** Data Science Methodology, Cyber Security Essentials.
- **Training:** Completed a 30-day Core Java workshop at Bahra University, along with additional training in Advanced DSA, Cyber Security, and Cloud Computing Fundamentals.
